

BRING YOUR RADIO AND TELECOM PRODUCTS TO THE MARKET FAST!

Nemko Comlab - your supporting partner in the development phase

Our services

- **Pre-compliance test**

- Test and advisory services during development
- Early design verification with respect to product quality
- Avoid expensive redesign late in the development phase
- Contributes to earlier product launch

- **Test and certification services**

- Accredited radio and telecommunications testing and certification for CE (EU/EEA), FCC (USA) and IC (Canada)
- Accredited lab for EMC testing
- Accredited lab for test & certification of maritime navigation and radio communications equipment in accordance to the Marine Equipment Directive - MarED (Wheelmark)
- Accredited lab for environmental and vibration tests
- Accredited lab for test of products in explosive environments - Ex Mark
- SAR (Specific Absorption Rate) measurements
- Accredited lab for Safety testing
- Accredited lab for test of medical equipment
- RoHS testing and certification

- **World Wide Market Access - Telecom Direct**

- Tests and certificates providing market access to Europe, North America, Australia/New Zealand, Russia, Ukraine and numerous other countries
- We can help you to achieve certificates and other necessary documentation, in addition to assist you with import barriers, for countries with special restrictions or requirements to radio and telecom equipment

Our facilities

- 10m and 3m anechoic chambers for EMC- and radio measurements
- Complete DECT testing; radio, EMC, access, acoustics and protocol
- Test of radio equipment for most international standards
- RF measurements up to 40GHz
- Test of xDSL
- Acoustic measurements
- Environmental test lab
